To Whom It May Concern:

The Canadian Diabetes Association is pleased to support the GlucoGuide system, a health company with mobile applications and advanced data analytics that works to improve diabetes management and overall health management.

The Association's mission is to lead the fight against diabetes by helping people with diabetes live healthy lives while we work to find a cure. To carry out our mission, we are always looking for opportunities to work together with other like-minded individuals and organizations to engage and educate the community. We believe GlucoGuide is an exciting and innovative system that unites the technology and health care sectors.

As part of our support, the Association is prepared to participate in an advisory capacity to inform the project development and implementation. We will be more than happy to share up-to-date resources, materials and tools that may be incorporated into the project. As well, if required, we will facilitate linkages to other potential collaborators and/or partners.

We thank Dr. Charles Ling and the GlucoGuide team for this opportunity and we are looking forward to working together with him and his team to address the needs of people with diabetes.

Sincerely,

A handwritten signature in black ink, appearing to read 'Anne Le Quang', with a stylized flourish at the end.
